

N2S-DFM-0522

PIPELINE CHEMISTRY

NON-TOXIC DEFOAMER

PRODUCT INFORMATION

N2S-DFM-0522 is a water-soluble, non-toxic defoamer designed to combat foam generated during pigging operations. When a pig traverses a pipeline, it can induce turbulence, leading to persistent foaming in pipeline systems. This foam can cause the chemicals to overflow the receiving containment, potentially leading to ground contamination and safety hazards. N2S-DFM-0522 is formulated with foam-control polymers to deliver rapid foam knockdown and long-lasting suppression even under high-turbulence conditions.

PHYSICAL PROPERTIES

Appearance: Hazy White Liquid
Specific Gravity: 0.990 – 1.020
Flash Point: Closed Cup: >212°F

STORAGE & HANDLING

Keep container closed. Follow safe warehousing practices. Handle as an industrial chemical, wearing protective equipment and observing the precautions as described in the Safety Data Sheet (SDS).

KEY BENEFITS

- Non-toxic
- Non-hazardous
- Rapid Foam Knockdown
- Long-lasting Suppression

APPLICATION

N2S-DFM-0522 should be applied at the receiving end of the pipeline to control foam as the chemical exits the line. Add the chemistry as needed to achieve effective foam reduction, adjusting dosage based on flow conditions, turbulence, and foam tendency.
